

# Aviation Asset Depreciation

Specialist Module for Aircraft Leasing

Core Financial Systems' Aviation Asset Depreciation module is purpose-built for aircraft leasing companies. Integrated with Infor SunSystems, it automates complex depreciation, ensures compliance, and delivers real-time financial insights, empowering your team to focus on growth and value creation.

## Key Features & Benefits

**Comprehensive Asset Register:** Central repository for all aircraft and engine assets, with key data, linked documents, and certifier validation.

**Aviation-Specific Depreciation:** Handles complex rules for aircraft and engine assets, including cost components, fair value adjustments, impairments, lease term depreciation, and negative depreciation.

**Automated Workflows:** Streamlines and manages asset events such as Held for Sale, Disposals, Intercompany Transfers, End-of-Life Adjustments, and Monthly Posting.

**Infor SunSystems Integration:** Direct connection to SunSystems ledger, no duplication of financial data, instant updates.

**Robust Security & Compliance:** Audit trails and regulatory compliance built-in.

**Flexible System Configuration:** Full admin control over business units, account groups, asset classes, models, and leases.

**Powerful Reporting:** Standard and custom reports delivered in Excel, with dynamic drill-down and pivot tables.

## Module Highlights

The Asset Depreciation module focuses on 3 essentials: a centralised Asset Register for complete visibility, automated Depreciation Workflows for accuracy and compliance, and powerful Reporting & Analytics for real-time insights.
