

Master Data Management

Unify Your Data. Enhance Accuracy. Drive Compliance.

Core Financial Systems' MDM module provides a single source of truth for critical master data. It delivers structured, auditable workflows for the controlled creation and modification of master records and associated details, ensuring every change follows a clearly defined approval process. Integrated with Infor SunSystems, it ensures consistency, accuracy, and compliance across your organisation, reducing errors and improving operational efficiency.

Key Features & Benefits

Centralised Data Repository: Manage master records (legal entities, accounts, and analysis codes) in one place.

Structured Approval Workflows: Every master record is routed for approval, with handling of queries, and tracking of authorisations, ensuring proper governance and compliance.

Data Consistency Across Systems: Automatic synchronisation with Infor SunSystems and related modules.

Role-Based Access: Data entry, approver, authoriser, and monitor roles provide controlled access and oversight.

Improved Compliance: Maintain audit trails and enforce data governance policies.

Enhanced Accuracy: Reduce duplication and manual errors with controlled workflows.

Scalable Architecture: Designed to support complex aviation leasing structures and global operations.

Module Highlights

Legal Entity Management

Account & Analysis Codes

Vendor & Bank Details

Attachments & Validation

Approval & Authorisation

Workflow Control

Integration

Why Core Financial?

With over **25 years' experience**, Core Financial Systems is a trusted partner for aviation leasing companies worldwide, offering deep industry expertise, a proven track record with leading lessors, certified Infor SunSystems integration as a Gold Reseller Partner, flexible solutions tailored to your needs, and dedicated support for seamless integration, cloud optimisation, and long-term success.
