

# Payables Invoice & Intercompany Processing

Specialist Module for Aircraft Leasing

Core Financial Systems' Aviation Payables modules automate cost allocation, intercompany postings, and invoice workflow approvals, giving your finance team accuracy, control, and total compliance across complex SPV structures.

## Key Features & Benefits

**Payables Invoice Processing:** Manage overhead and technical invoices efficiently and accurately. Documents, approvals, allocations, and compliance, all in one workflow.

- Intelligent approval workflow routing
- Review, approve, hold, or reject
- Centralised attachment storage
- Full auditability for internal & external review
- Real-time posting to Infor SunSystems

**Payables Intercompany Processing:** Automate financial postings between SPVs with precision and transparency.

- Define multi-step intercompany mappings
- Automate due-to / due-from entries
- Handle intermediary SPVs and complex structures
- Maintain accurate, compliant intercompany balances
- Designed specifically for aviation leasing reporting frameworks

## Module Highlights

The Payables modules focus on 3 essentials: complete aviation-specific invoice capture (Fund/Deal, Legal Entity, Asset, Lessee, Contract) with documentation, automated allocation, approval, and intercompany workflows with full auditability and seamless integration with our PO processing, budgeting, and technical project controls modules for compliant end-to-end financial management.
