

# Purchase Order Processing

Specialist Module for Aircraft Leasing

Core Financial Systems' Purchase Order Processing module provides aviation lessors with structured, auditable control over the procurement of technical parts and services. It enables accurate coding to aircraft assets and legal entities, automates approval workflows, tracks revisions, and ensures complete visibility across the PO lifecycle, delivering accuracy, compliance, and seamless integration with project budgeting and payables.

## Key Features & Benefits

**Purchase Order Processing:** Structured procurement control for Technical and Asset Management teams.

- Intelligent PO approval workflow routing
- Review, approve, hold, or reject
- Automatic revision tracking with vendor-visible revision numbers
- Multi-asset / multi-entity PO support
- Delivery address & shipping instruction management
- Full auditability for internal & external review

**Integrated Project & Payables Visibility:** Live visibility of budget, spend, and invoice status.

- Link PO costs to Project and draw down budgets
- See budget impact directly inside the PO
- Drill through to Project to analyse existing spend
- See invoiced amounts and outstanding balances
- Drill into Payables invoice details and status

## Module Highlights

The Purchase Order module focuses on 3 essentials: structured aviation-specific PO creation (MSN/ESN, Legal Entity, Contract, Lessee), automated approval and revision workflows with full auditability, and seamless integration with Payables and Technical Project Budgeting for complete end-to-end control.
